EDUCATION

BINUS University

Bachelor of Computer Science, Database technology GPA: 3.68 / 4.0

Aug 2024 - Present

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, Scikit-learn, XGBoost, Apache Spark, Hadoop, HDFS, Hive

Analytics & Tools: Power BI, DAX, Power Query, Tableau, Matplotlib, PostgreSQL, MySQL, Git, GitHub, Jupyter, REST API

WORK EXPERIENCES

PT Satya Ragam Truxpress

June 2026 – Aug 2026

Software Engineer Intern | *Laravel, React, PostgreSQL, Payroll, Data Processing*

- Developed and maintained a payroll application supporting operations across 8 entities, including payroll calculation, recaps, payslips, and division-level reporting.
- Processed, validated, transformed, and aggregated attendance and employee data to support PPh 21 and Coretax-related payroll requirements.

BINUS University

Mar 2026 - Present

SASC Scholarship Mentor Program | *Data Analytics, Big Data Processing, Data Engineering, Programming*

- Mentored 8 students across multiple semesters in Data Analytics, Big Data Processing, Data Engineering, programming and others.
- Guided students through coursework, analytical approaches, and technical problem-solving.

HIMTI BINUS University

Manager of HIMTI Care | *Leadership, Project Planning, Team Coordination*

Jan 2026 - Present

- Lead and coordinate 50+ student activists across multiple regions, managing project planning, task allocation, and progress tracking.
- Contributed to multiple HIMTI programs through mentoring, event coordination, cross-functional collaboration, and operational planning.

PROJECTS

SIAGA | Python, XGBoost, Scikit-learn, GloFAS, ERA5, WorldPop, OpenStreetMap, Sentinel-1, CVaR

- Developed a multi-hazard early warning and resource allocation system for flood and drought risks across multiple districts in Northern Java, integrating climate, population, geographic, and infrastructure data.
- Built XGBoost models with isotonic calibration and a decision-support workflow for risk prediction, incident monitoring, and resource allocation.

Shopee Sales Analytics | Python, SQL, DAX, Pandas, Power BI, Power Query, Matplotlib

- Developed an end-to-end e-commerce analytics project investigating product categories with strong and widespread favorite engagement momentum through data validation, transformation, and KPI analysis.
- Performed exploratory analysis using Python and SQL and built an interactive Power BI dashboard to communicate category-level findings and evidence quality.

PayFlow HR | Laravel, React, PostgreSQL, REST API, Tailwind CSS, Git

- Developed a payroll management system supporting final payroll calculation, payslips, payroll recaps, and division-level reporting.
- Processed, validated, transformed, and aggregated attendance and employee data to support payroll workflows, including PPh 21 and Coretax processing.

HONORS & AWARDS

4th Place in Ristek UI Datathon

Aug 2026

Achieved 4th place among 200+ teams through 2 Kaggle competitions, and product development. Developed SIAGA, a multi-hazard early warning system and an AI-powered disaster management product.

S-Class Student, Computer Science Program

Jan 2026 – Present

Selected through a competitive process for an intensive program for high-achieving Computer Science students. Participated in competitions as a Ureeka member while receiving advanced technical training.
